

- 
- Project Showcase: To-Do List and Simple Calculator by Shivam Tiwari (Roll No. 2200290120160, CS 5C)

# Introduction

**Project** focuses on two essential applications: a **To-Do List** and a **Simple Calculator**. These projects demonstrate fundamental programming skills and practical applications of software development. The goal is to enhance productivity and simplify daily tasks through effective tools.

# To-Do List Features

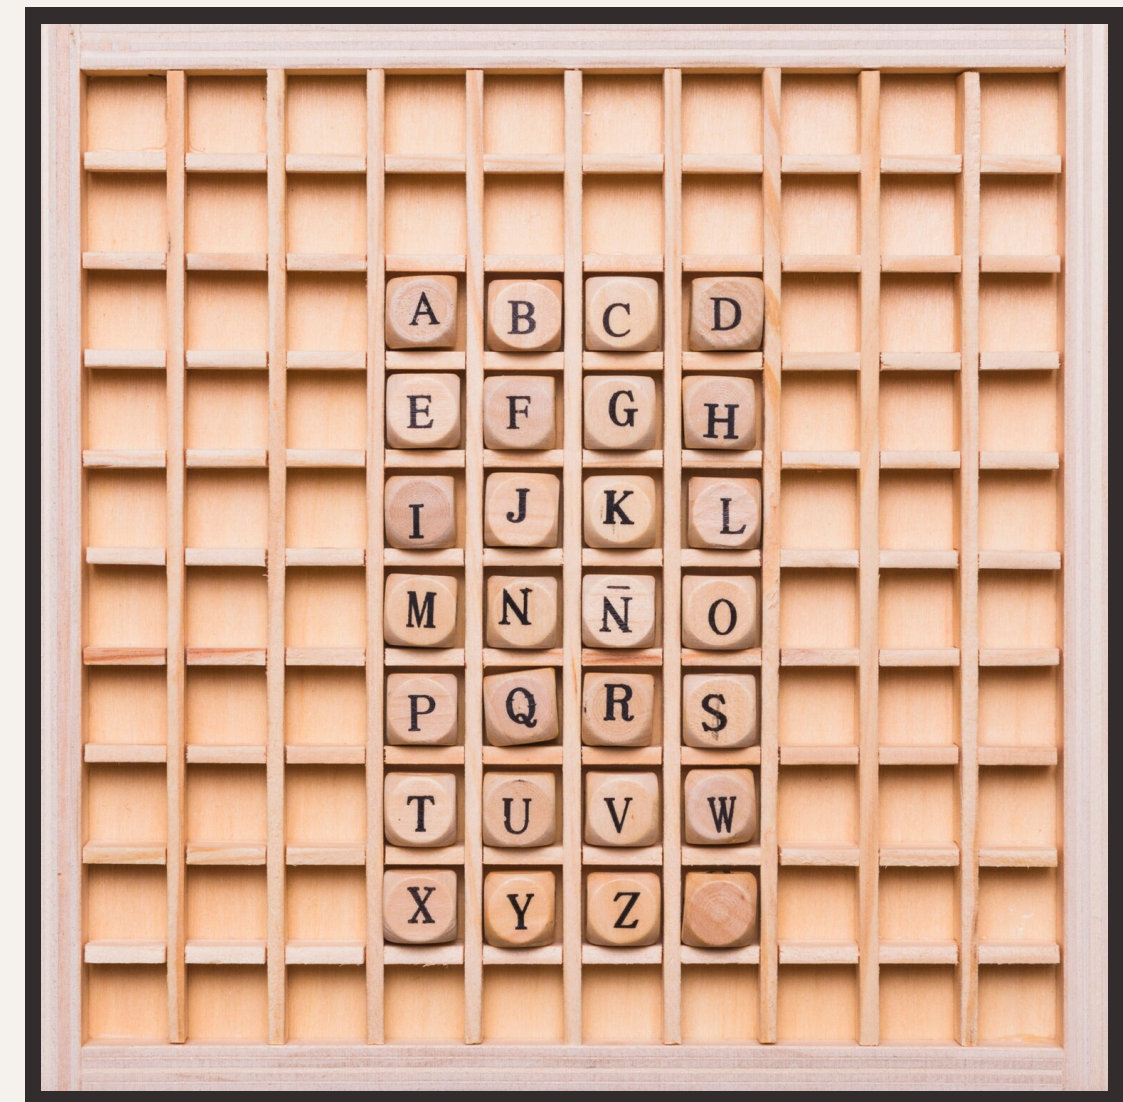

The **To-Do List** application allows users to **organize** tasks efficiently. Key features include adding, editing, and deleting tasks, along with marking them as complete. This tool promotes **time management** and helps users stay focused on their priorities, ultimately improving productivity.

# Simple Calculator Functions

The **Simple Calculator** project provides basic arithmetic operations, including **addition**, **subtraction**, **multiplication**, and **division**. It is designed for ease of use, making calculations accessible to everyone. This project showcases the application of **algorithms** in programming while emphasizing user experience.

# Conclusion

In conclusion, Shivam Tiwari's projects, the **To-Do List** and **Simple Calculator**, exemplify essential programming concepts and user-centric design. These applications not only serve practical purposes but also reflect the developer's ability to create functional software. Future enhancements could further improve usability and features.

Thanks!
