

Project Showcase Report: To-Do List and Simple Calculator

Developer: Shivam Tiwari

Roll No.: 2200290120160

Class: CS 5C

1. Introduction

The project focuses on developing two fundamental applications - a To-Do List and a Simple Calculator. These projects demonstrate foundational programming skills and practical application in software development. The goal of these applications is to increase productivity and simplify everyday tasks through user-friendly tools.

2. Project Overview

A. To-Do List Application

The To-Do List is designed to help users organize and manage tasks effectively. Key features include:

- Task Management: Users can add, edit, delete, and mark tasks as complete.
- Productivity Boost: The tool promotes time management, aiding users in staying focused on priorities, thus enhancing overall productivity.

B. Simple Calculator Application

This application performs basic arithmetic operations, including addition, subtraction, multiplication, and division. It is designed to be intuitive, making calculations easy and accessible.

- Key Functions: Basic operations that are crucial for day-to-day calculations.
- User Experience: Emphasis on ease of use, reflecting the application of algorithms and programming skills in a user-centered way.

3. Conclusion

Shivam Tiwari's To-Do List and Simple Calculator projects illustrate essential programming concepts and a focus on user-friendly design. These applications not only provide practical value but also highlight the developer's skills in creating functional and accessible software. Future improvements could further enhance usability and expand features, adding more versatility to both applications.
